Skills

Work Experience

Facilitator / starterstech.com/

Jan 10 2022 - Current

At Starter technology I work as a facilitator and a Science Technology Engineering Mathemathics (STEM) Instructor.I impact knowledge like **Figma design skills**, **HTML and CSS** skills, **Tinkercad** skill for electronic, **Code.org,CodeCombat** which teach some core fundamentals like sequencing, condition,event etc.

Web Application Security Test (WAST)/ Self taught

May 2023 - Current

I have always been interested in Web Application security Testing, so I started to learn how to build web applications in order to understand the web, the experience is good but am still learn. I got a book online and bought myself some tutorials inorder to learn the craft, So far it been good and I have learnt alot in a short time ie: how to use docker and nginx server to GET and POST HTTP 1.1 request, I have aslo go to known how to transfer file,Communicate and a bind and reverse shell using Socat and Netcat etc. Github link to WAST.
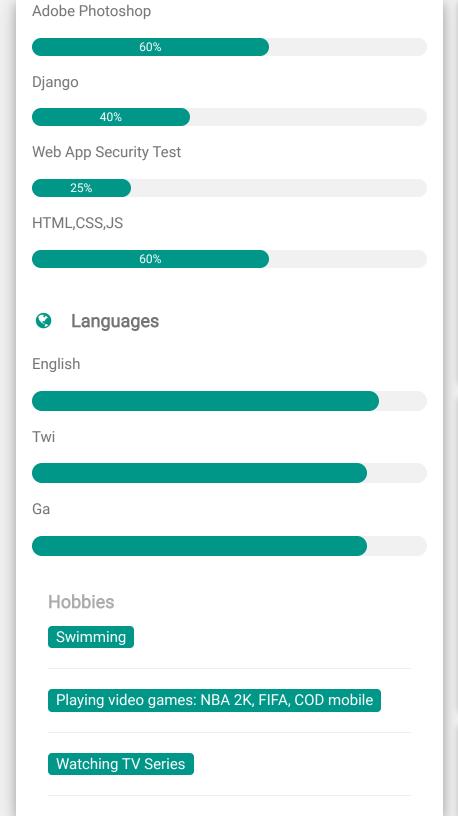

CyberSecurity Instructor / Ghana Communication Technology University (GCTU) Engineering Club.

Jun 2022 - Jan 2023

My co-Instructor and I assisted and taught our fellow colleagues and other IT and Engineering students the basic CyberSecurity staff like enumeration,Reconniasances,basic networking knownledge and played some CTF and machines.

Internship At SOKO Aerial And Robotics/ Burma Camp.

Playing video games: NBA 2K, FIFA, COD mobile

Watching TV Series

📅 **Short Internship(One and a half month.)**

At SOKO Aerial and Robotic I Learn the mechanics and electronics involve in drone building My fellow interns and I were task to build three(3) delt fixed wing drone.These are some of the tools we used in the building process: hard cadboard,a propeller, Our payload(battery), servo motors for the elevon (both ailerons and elevator), ESC Com for converting Direct Current(DC) from the battery to the battry to Alternating Current(AC) etc. We were also task to create a drone database to locate every drone in the world.We built the website and gathered the data but unfortunate we did not populate the site with the data.

Capture The Flag(CTF).

📅 **Gamified Hacking**

CTF is one of the ways I learn to hack, I have played in a couple of them and which helped me learn to use some of the tools in the industy.

🏵 Certificates

One Day Workshop on Robotics - BlueCrest College March 2018

Three Days Training on Networking At The Telecom Department - GCTU Nov 2019

Advent of Cyber - TryHackMe Dec 2021

Inter-houses/ Games Competition which was held in Oct 2018 at the Labone Senior High School, I came out with Third place in the 5000 metres (Boy)

Huawei Certification on routing and switching - Huawei Issued 2021 - Expires May 21 2024

🏵 Education

CTFs

BasketBall/FootBall

DOWNLOAD CV

Ghana Communication Technology University (GTUC)

📅 2019 - Current

Undergraduate Degree on going with some few month left to graduate God willing.

Labone Senior High

📅 2016 - 2019

Completed

Forces Basic School

📅 2016

Completed
